

| Edexcel Single Biology (1BI0) from 2016 Topics B6&7 |  |          |   |          |  |  |  |  |
|---|--|----------|---|----------|--|--|--|--|
| Topic   | Student Checklist  | R        | Α | G        |  |  |  |  |
| ctions  | Describe photosynthetic organisms as the main producers of food and therefore biomass                      |          |   |          |  |  |  |  |
|   | Describe photosynthesis in plants and algae as an endothermic reaction and recall the reactants and        |          |   |          |  |  |  |  |
|   | products   |          |   |          |  |  |  |  |
|   | Explain the effect of temperature, light intensity and carbon dioxide concentration as limiting factors on |          |   |          |  |  |  |  |
|   | the rate of photosynthesis   |          |   |          |  |  |  |  |
|   | HT ONLY: Explain the interactions of temperature, light intensity and carbon dioxide concentration in      |          |   |          |  |  |  |  |
| fur   | limiting the rate of photosynthesis  |          |   |          |  |  |  |  |
| eir   | Core Practical: Investigate the effect of light intensity on the rate of photosynthesis                    |          |   |          |  |  |  |  |
| es and th   | HT ONLY: Explain how the rate of photosynthesis, including the use of the inverse square law               |          |   |          |  |  |  |  |
|   | calculation  |          |   |          |  |  |  |  |
|   | Explain how the structure of the root hair cells is adapted to absorb water and mineral ions               |          |   |          |  |  |  |  |
| tu  | Explain how the structures of the xylem and phloem are adapted to their function in the plant              |          |   |          |  |  |  |  |
| Luc   | Describe how water and mineral ions are transported through the plant by transpiration, including the      |          |   |          |  |  |  |  |
| - Plant stı   | structure and function of the stomata  |          |   |          |  |  |  |  |
|   | Describe how sucrose is transported around the plant by translocation                                      |          |   |          |  |  |  |  |
|   | Bio ONLY: Explain how the structure of a leaf is adapted for photosynthesis and gas exchange               |          |   |          |  |  |  |  |
| ė   | Explain the effect of environmental factors on the rate of water uptake by a plant                         |          |   |          |  |  |  |  |
| pic   | Demonstrate an understanding of rate calculations for transpiration  |          |   |          |  |  |  |  |
| 2   | Bio ONLY: Explain how plants are adapted to survive in extreme environments                                |          |   |          |  |  |  |  |
|   | Bio ONLY: Explain how plant hormones control and coordinate plant growth and development, including        |          |   |          |  |  |  |  |
|   | the role of auxins   |          |   |          |  |  |  |  |
|   | HT & Bio ONLY: Describe the commercial uses of auxins, gibberellins and ethene in plants                   |          |   |          |  |  |  |  |
|   | Recall where different hormones are produced and how they are transferred to their target organs           |          |   |          |  |  |  |  |
|   | HT ONLY: Explain where adrenalin is produced and how it prepares the body for fight or flight              | 1        |   |          |  |  |  |  |
|   | HT ONLY: Explain how thyroxine controls metabolic rate as an example of negative feedback                  | 1        |   |          |  |  |  |  |
| neostasis   | Describe the stages of the menstrual cycle, including the roles of the hormones oestrogen and              |          |   |          |  |  |  |  |
|   | progesterone, in the control of the menstrual cycle  |          |   |          |  |  |  |  |
|   | HT ONLY: Explain the interactions of oestrogen, progesterone, FSH and LH in the control of the             |          |   |          |  |  |  |  |
|   | menstrual cycle  |          |   |          |  |  |  |  |
|   | Explain how hormonal contraception influences the menstrual cycle and prevents pregnancy                   |          |   |          |  |  |  |  |
|   | Evaluate hormonal and barrier methods of contraception   |          |   |          |  |  |  |  |
|   | HT ONLY: Explain the use of hormones in Assisted Reproductive Technology (ART) including IVF and           |          |   |          |  |  |  |  |
| ho  | clomifene therapy  |          |   |          |  |  |  |  |
| pu  | Explain the importance of maintaining a constant internal environment in response to internal and          |          |   |          |  |  |  |  |
| ola   | external change  |          |   |          |  |  |  |  |
| on, contro  | Bio ONLY: Explain the importance of homeostasis, including: thermoregulation – effect on enzyme            |          |   |          |  |  |  |  |
|   | activity and osmoregulation – effect on animal cells   |          |   |          |  |  |  |  |
|   | Bio ONLY: Explain how thermoregulation takes place, with reference to the function of the skin             |          |   |          |  |  |  |  |
| ati   | Bio ONLY: Explain how thermoregulation takes place, with reference to: shivering                           |          |   |          |  |  |  |  |
| din   | HT & Bio ONLY: Explain how thermoregulation takes place, with reference to: vasoconstriction and           |          |   |          |  |  |  |  |
| 00  | vasodilation   |          |   |          |  |  |  |  |
|   | HT ONLY: Explain how blood glucose concentration is regulated by glucagon                                  |          |   |          |  |  |  |  |
| Topic 7 – Anima                                     | Explain how the hormone insulin controls blood glucose concentration                                       |          |   |          |  |  |  |  |
|   | Explain the cause of type 1 diabetes and how it is controlled  |          |   |          |  |  |  |  |
|   | Explain the cause of type 2 diabetes and how it is controlled  |          |   |          |  |  |  |  |
|   | Evaluate the correlation between body mass and type 2 diabetes including waist: hip calculations and       |          |   |          |  |  |  |  |
|   | BMI, using the BMI equation  | -        |   |          |  |  |  |  |
|   | Bio ONLY: Describe the structure of the urinary system   | <u> </u> |   |          |  |  |  |  |
|   | BIO ONLY: Explain how the structure of the nephron is related to its function in filtering the blood and   | 1        |   |          |  |  |  |  |
|   | torming urine  | <u> </u> |   | <b> </b> |  |  |  |  |
|   | HT & Bio ONLY: Explain the effect of ADH on the permeability of the collecting duct in regulating the      | 1        |   | ĺ        |  |  |  |  |
|   | water content of the blood   |          |   | <b> </b> |  |  |  |  |
|   | BIO UNLY: Describe the treatments for kidney failure, including kidney dialysis and organ donation         |          |   |          |  |  |  |  |
|   | BIO UNLY: Recall what urea is produced from and where this occurs in the body                              | 1        |   | L        |  |  |  |  |

## Personalised Learning Checklists Edexcel Single: Biology Paper 2

| Edexcel Single Biology (1BI0) from 2016 Topics B8&9 |   |   |   |   |  |  |  |  |
|---|---|---|---|---|--|--|--|--|
| Topic   | Student Checklist   | R | Α | G |  |  |  |  |
| als   | Describe the need to transport substances into and out of a range of organisms, including oxygen,         |   |   |   |  |  |  |  |
|   | carbon dioxide, water, dissolved food molecules, mineral ions and urea                                    |   |   |   |  |  |  |  |
|   | Explain the need for exchange surfaces and a transport system in multicellular organisms including the    |   |   |   |  |  |  |  |
|   | calculation of surface area: volume ratio   |   |   |   |  |  |  |  |
| in  | Explain how alveoli are adapted for gas exchange by diffusion between air in the lungs and blood in       |   |   |   |  |  |  |  |
| an  | capillaries   |   |   |   |  |  |  |  |
| , in  | Bio ONLY: Describe the factors affecting the rate of diffusion, including surface area, concentration     |   |   |   |  |  |  |  |
| transport   | gradient and diffusion distance   |   |   |   |  |  |  |  |
|   | Bio ONLY: Calculate the rate of diffusion using Fick's law: rate of diffusion = surface area x            |   |   |   |  |  |  |  |
|   | concentration difference / membrane thickness of membrane   |   |   |   |  |  |  |  |
| pu  | Explain how the structure of the blood is related to its function: red blood cells (erythrocytes), white  |   |   |   |  |  |  |  |
| ea  | blood cells (phagocytes and lymphocytes), plasma and platelets  |   |   |   |  |  |  |  |
| ang   | Explain how the structure of the blood vessels is related to their function                               |   |   |   |  |  |  |  |
| chi   | Explain how the structure of the heart and circulatory system is related to its function, including the   |   |   |   |  |  |  |  |
| ĒX  | role of major blood vessels, valves and thickness of chamber walls  |   |   |   |  |  |  |  |
| 8   | Describe cellular respiration as an exothermic reaction which occurs continuously in living cells to      |   |   |   |  |  |  |  |
| pic   | release energy for metabolic processes, including aerobic and anaerobic respiration                       |   |   |   |  |  |  |  |
| 10  | Compare the process of aerobic respiration with the process of anaerobic respiration                      |   |   |   |  |  |  |  |
|   | Core Practical: Investigate the rate of respiration in living organisms                                   |   |   |   |  |  |  |  |
|   | Calculate heart rate, stroke volume and cardiac output, using the equation cardiac output = stroke        |   |   |   |  |  |  |  |
|   | volume × heart rate   |   |   |   |  |  |  |  |
|   | Describe the different levels of organisation from individual organisms, populations, communities, to     |   |   |   |  |  |  |  |
|   | the whole ecosystem   |   |   |   |  |  |  |  |
|   | Explain how communities can be affected by abiotic and biotic factors, including: temperature, light,     |   |   |   |  |  |  |  |
|   | water, pollutants and competition, predation  |   |   |   |  |  |  |  |
|   | Describe the importance of interdependence in a community   |   |   |   |  |  |  |  |
|   | Describe how the survival of some organisms is dependent on other species, including parasitism and       |   |   |   |  |  |  |  |
|   | mutualism   |   |   |   |  |  |  |  |
|   | Core Practical: Investigate the relationship between organisms and their environment using field-work     |   |   |   |  |  |  |  |
|   | techniques, including quadrats and belt transects   |   |   |   |  |  |  |  |
|   | Explain how to determine the number of organisms in a given area using raw data from field-work           |   |   |   |  |  |  |  |
| cles  | Techniques, including quadrats and beit transects   |   |   |   |  |  |  |  |
| Č   | bio ONLY: Explain now some energy is transferred to less useful forms at each trophic level and that      |   |   |   |  |  |  |  |
| ria   | Rio ONLY: Calculate the officiency of energy transfers between transfer levels                            |   |   |   |  |  |  |  |
| ate   | calculations of biomass   |   |   |   |  |  |  |  |
| 3   | Explain the positive and negative human interactions within ecosystems and their impacts on               |   |   |   |  |  |  |  |
| and   | high the positive and negative numar interactions within ecosystems and their impacts on                  |   |   |   |  |  |  |  |
| us.   | Explain the benefits of maintaining local and global biodiversity including the conservation of animal    |   |   |   |  |  |  |  |
| ste   | species and the impact of reforestation   |   |   |   |  |  |  |  |
| sks   | Bio ONLY: Describe the biological factors affecting levels of food security                               |   |   |   |  |  |  |  |
| Ecc   | Describe how different materials cycle through the abiotic and biotic components of an ecosystem          |   |   |   |  |  |  |  |
| 6   | Explain the importance of the carbon cycle, including the processes involved and the role of              |   |   |   |  |  |  |  |
| Dic   | microorganisms as decomposers   |   |   |   |  |  |  |  |
| To  | Explain the importance of the water cycle, including the processes involved and the production of         |   |   |   |  |  |  |  |
|   | potable water in areas of drought including desalination  |   |   |   |  |  |  |  |
|   | Explain how nitrates are made available for plant uptake, including the use of fertilisers, crop rotation |   |   |   |  |  |  |  |
|   | and the role of bacteria in the nitrogen cycle  |   |   |   |  |  |  |  |
|   | HT & Bio ONLY: Evaluate the use of indicator species as evidence to assess the level of pollution, for:   |   |   |   |  |  |  |  |
|   | polluted water and air quality  |   |   |   |  |  |  |  |
|   | Bio ONLY: Explain the effects of temperature, water content and oxygen availability on the rate of        |   |   |   |  |  |  |  |
|   | decomposition in food preservation  |   |   |   |  |  |  |  |
|   | Bio ONLY: Explain the effects of temperature, water content and oxygen availability on the rate of        |   |   |   |  |  |  |  |
|   | decomposition in composting   |   |   |   |  |  |  |  |
|   | Bio ONLY: Calculate rate changes in the decay of biological material                                      |   |   |   |  |  |  |  |
